Trans. of Akademiya Nauk SSSR. Geofizicheskii
Institut. Trudy, 1953, v. 20(147) p. 20-36.

DESCRIPTORS: *Wave analysis, *Vibration,
Propagation, *Elasticity.

Sinusoidal vibrations excited by a point source in
an ideally elastic medium consisting of a layer lying
between two semi-spaces are considered. It is
shown that the main part of the displacement remote
from the source consists of waves of a specific type.
Some of the properties of these waves are
investigated. (Author)
